Cost Allocation Methodology

City of Miami, Florida Cost Allocation Methodology

OVERVIEW

The City of Miami's (the City) Cost Allocation Plan identifies the costs of indirect services provided by central service departments of the City based on actual expenditures for fiscal year ending September 30, 2015.

The Cost Allocation Plan is used by the City to claim indirect costs as charges against awards (grants) and City funds. The list of federal/state grants and awards that are charged indirect costs based on the results of this plan are located in Schedule F – Indirect Cost Rate Proposal.

The Cost Allocation Plan is a document that distributes, or allocates, City indirect costs. Indirect costs are those costs incurred by City divisions and departments that benefit other City divisions and departments. Examples of City indirect costs are personnel, purchasing, human resources and the Finance Department.

The primary purpose for preparing the Cost Allocation Plan is to (1) identify the appropriate division and department indirect costs and (2) calculate corresponding indirect cost rates if needed.

The significant steps involved in preparing the Cost Allocation Plan include the following:

- Identify the City divisions and departments that provide support to other City divisions and departments. These divisions and departments are referred to as central service or allocating departments.
- Identify the City divisions and departments that receive support from other City divisions and departments. These departments are referred to as grantee or receiving departments.
- Accumulate the allowable actual expenditures of the City divisions and departments that provide support to other City divisions and departments.
- Distribute, or allocate, the allowable expenditures of the City divisions and departments that provide support to other City divisions and departments based on available, meaningful, measurable and auditable allocation statistics that match the service provided to the service received.

PROCESS

A double-step down allocation methodology is used to allocate the allowable costs of the central service divisions and departments. This methodology recognizes the cross support provided between central service divisions and departments. For example, accounting supports the information systems department by providing payroll, paying vouchers and preparing a budget. However, the information systems department also supports accounting by providing software and hardware support and by maintaining and administering various applications and systems.

The double-step down methodology requires an initial sequencing of allocating divisions and departments. In the first step of the double-step methodology, allowable costs from central service divisions and departments are allocated in the sequence selected to all City divisions, departments and funds; including to other central service divisions and departments. The second step in the double-step down methodology is made to fully account for the cross support provided between central service divisions and departments. Central service divisions and departments are closed after the second step in the double-step down allocation methodology.

FORMAT OF THE REPORT

The City's Cost Allocation Plan is organized as follows:

- 1. Nature and Extent of Services for the Central Service Department
- 2. Summary schedules
- 3. Detail schedules

The Nature and Extent of Services is a narrative description of the central service and each function that was identified. Also described are the allocation bases used for each function and other relevant information on expenditures.

The Summary Schedules provide a recap of the results of the cost allocation process as described below:

A table of contents is included at the beginning of the Plan. The allocation of costs has been accomplished in the same order as shown in the Table of Contents. The Table of Contents also permits the ready identification of the following summary data and sections of the Plan:

1. Schedule A - Allocated Costs by Department demonstrates for each Receiving Department the costs received from each Central Service Department. This schedule answers the question:

Which Central Service Department actually allocated the costs to each Receiving Department?

- 2. Schedule C Summary of Allocated Costs is the simplest report to use when balancing to the financials. This schedule demonstrates the full sequence of all departments. The Central Service Departments are listed first and in the order of their allocating sequence. Basically this schedule demonstrates the costs to be allocated, the adjustments made to these costs, and the results of the allocations. The Receiving Departments follow the Central Service Departments with the total allocations received from all Central Service Departments.
- 3. Schedule D Detail of Allocated Costs provides a view of the allocation flow of costs for each Central Service Department. This schedule allows the reader to see how the process sequentially zeroes out all the Central Service Department costs and allocates them to Receiving Departments.
- 4. Schedule E Summary of Allocated Costs demonstrates for each Central Service Department the services or functions of the Central Service Department and the basis for the allocation of each function. This schedule is a convenient reference for reviewing the activities identified for each Central Service Department. This is particularly important when preparing a new plan and incorporating organizational and services changes.
- 5. Schedule F Indirect Cost Rate Proposal calculates indirect cost rates for selected Receiving Departments. The indirect rate is computed as the total indirect costs allocated to the Receiving Department divided by the total Salary cost of the Receiving Department.

The detail schedules follow the summary schedules in the cost allocation plan. These schedules demonstrates the original costs being allocated by each Central Service Department. The adjustments are applied; the functions are defined; the incoming costs from other Central Service Departments are detailed; the allocation calculations for both step-downs are documented; and the results for each Central Service Department are summarized.
