ENCLOSURES :

---

The purpose of this memo is to restate the policy regarding the Quint and Engine single company dispatch sequence at both Stations 4 and 8.

The Quint is to be dispatched on single company responses requiring water such as trash fires, etc. Please assure that this policy is followed.

I realize that at Station 4 with the assignment of the NEW Quint, it will probably be necessary to reassess this policy. I will need to meet with Local 587 in order to come to an agreement regarding assignments before any changes can be made. Until then, the sequence is to remain as is.
